Portrait: I graduated as a civil engineer and project manager from HBC Hochschule Biberach. I spent a semester at Ed. Züblin AG in Stuttgart, where I experienced the practical side of the business. Now, since June 2022, I have been able to master new challenges, develop innovative ideas and grow steadily at Gartenmann Engineering AG - for me, that is the key to success! The varied professional life demands just such counterpoints, which I find in sport, baking and travelling.
