**Portrait:** My apprenticeship as a qualified heating engineer in Berne inspired me to do more, so I studied building services engineering with a specialisation in HVAC at the Lucerne University of Applied Sciences and Arts. After seven years in building services planning, there is no getting around the topics of sustainability and climate change. The consequence: the MAS degree in EN Bau alongside daily practice in a Lucerne engineering office in precisely the area of sustainable building and energy. The move to Gartenmann Engineering AG was the logical next step. Climbing heights - in addition to professional ones - is also fun for me physically in the form of bouldering, trail running and jogging.

**Career:**

seit Mai 2022	Projektleiter Energie, Nachhaltigkeit, Bauphysik <i>Gartenmann Engineering AG, Bern</i>
2020 - 2022	Projektleiter Energie und nachhaltiges Bauen <i>brücker+ernst gmbh sia, Luzern</i>
2014 - 2020	Projektleiter HLKS / BIM-Verantwortlicher / Prokurist <i>Grünig&amp;Partner AG, Liebefeld-Bern</i>
