Portrait: Consultancy activity based on a part-time degree in architecture completed in 1996 at the Evening Technical College in Bern and 32 years of experience in construction. Knowledge of various types of construction after travelling to countries such as Mexico, Canada, America, Africa and also within Europe. In his work as a carpenter, but also during the years of building biologically oriented structures, he became aware of the need for sustainable, natural solutions at an early stage. This is the approach he has pursued for 15 years as a consultant for energy, building physics and acoustics issues at Gartenmann Engineering. As a counterbalance, he has cycled thousands of kilometres in and around Switzerland.

Career:	seit 2007	Projektleiter Bauphysik, Akustik Energie <i>Gartenmann Engineering AG, Bern</i>
	2006 - 2007	Projektleiter <i>Paul Voegeli Architekten AG, Kerzers</i>
