Portrait: Worked at the Fribourg School of Engineering and Architecture, at the ENERGY Institute, then innovation manager at a Geneva foundation for energy and water treatment projects. Worked for almost three years as a consultant at Amstein + Walthert in Geneva. Joined the team of Gartenmann Engineering in Lausanne, motivated by sustainable construction and with a doctorate in the Laboratory of Solar Energy and Building Physics at EPFL.
His free time is dedicated to good food, nature, swimming in the South Seas, hiking in the mountains and cycling.
